

Non-paid Wildlife Internship at The Escondido Creek Conservancy

The Escondido Creek Conservancy is seeking two enthusiastic Wildlife Interns from March through June. The interns will assist with avian point count surveys, visual encounter surveys for amphibians, and American kestrel nest box monitoring. This is an exciting opportunity for aspiring wildlife biologists to gain valuable, hands-on experience in the field. Interns will contribute to wildlife conservation and further knowledge of the avian and amphibian populations within the Escondido Creek watershed for potential research projects and future management needs. Wildlife surveys will take place on Wednesday and Saturdays. Surveys will begin at sunrise. Six- to 8-hour days should be expected; some shifts will be split for night surveys.

Resumes will be accepted from 1/7/2021 to 2/22/2021. Please submit them to jamison@escondidocreek.org.

The Wildlife Internship will begin March 17 and conclude at the end of June.

Qualifications

- Experience with avian and amphibian identification a plus
- Environmental or wildlife studies
- Strong Interest in wildlife
- Be able to drive to different locations
- Be able to work early mornings and nights when needed
- Have the ability to walk long distances in cold and warmer weather conditions
- Work in areas with ticks and mosquitos
- Flexible schedule
- Positive attitude and enthusiasm for fieldwork
- Ability to consider safety in all work situations

Duties include

Avian and amphibian identification
Recording data
Using ArcCollector
Some data entry
